1 VIBROTECTOR is the ideal vibration monitor for all  
2 machines which run under approximately constant  
3 operating conditions such as, e.g.:

- 4           • Fans
- 5           • Ventilators
- 6           • Pumps
- 7           • Electric motors

8 VIBROTECTOR records broadband machine vibrations  
9 and transfers the resulting characteristic value  
10 as a current signal (4-20 mA) to the connected  
11 process control system. This value is compared  
12 with specified alarm thresholds and an alarm is-  
13 sued to the operating personnel if a value is  
14 exceeded.

15 VIBROTECTOR is available in three different con-  
16 figurations - for standard machines, low-speed  
17 machines and machines with high vibrations.
