1 VIBROWEB XP Online CMS and the OMNITREND database
2 software from PRÜFTECHNIK have been certified by
3 GL WindEnergie. The certification document was
4 handed over to Roland Schühle, Managing Director
5 of PRÜFTECHNIK Condition Monitoring GmbH, on the
6 20th of September 2005 by the management of Germa-
7 nische Lloyd WindEnergie GmbH (Christian Nath and
8 Bodo Helm) and Project Manager Thorsten Muuß dur-
9 ing the 'HUSUM Wind' trade fair. Hence VIBROWEB XP
10 meets the requirements of the "Guideline for the
11 Certification of Condition Monitoring Systems for
12 Wind Power Plants (WPP)" that came into force on
13 1st November 2003. The vendor-neutral PRÜFTECHNIK
14 accreditation applies for static RPM and variable
15 RPM WPPs with gearboxes. "As an independent system
16 manufacturer, we regard this certification from GL
17 Wind Energie as confirmation that the condition
18 monitoring of wind power plants is gaining in-
19 creasing importance and that condition monitoring
20 will become mandatory for future offshore plants.
21 This is confirmed by initial projects in America
22 and in Asia as well as the certification guideline
23 of GL for offshore plants," said Roland Schühle
24 during the handover of the certification document.
