Press release: VIBSCANNER balancer

Direct enquiries to: Fax: +49 (0)89/99616-300, Mrs. Brandmeir
eMail: info@pruftechnik.com

1 The new VIBSCANNER balancer is specially designed
2 for the balancing of rotors. With the support of
3 graphical user guidance, static and dynamic unbal-
4 ances can be compared in one or two planes. The
5 instrument is pre-programmed with the measurement
6 functions (vibration, FFT spectra) required for
7 the diagnosis of rotor unbalance.

8 VIBSCANNER balancer is based on the very success-
9 ful VIBSCANNER measurement data collector that has
10 already impressed many maintenance engineers with
11 its large number of practical measurement func-
12 tions and intuitive joystick operation.

13 Analysis and archiving of the measurement data
14 takes place in the OMNITREND PC software. For doc-
15 umentation of the results, a detailed balance re-
16 port can be printed out. The VIBSCANNER balancer
17 can be upgraded with all functions of the VIBSCAN-
18 NER measurement data collector if required.
